Personal Projects

Hostel Management System | MERN ([Visit Site](#)) | [Source Code](#) June 2022 - Present

- This is a group project on **MERN** stack to manage all hostel official works.
- Most of the front-end works done by me using **REACT JS**.
- For back-end work we used **MySQL**, **Express** and **Node JS**.

Tic Tac Toe Game | ReactJS ([Visit Site](#)) | [Source Code](#)

July 2022

- A tic tac toe game with a beautiful user interface.
- After every round of game it shows the history of wins. User can Clear the history or restart the game without clearing the history.

Weather Application | ReactJS ([Visit Site](#)) | [Source Code](#)

July 2022

- Showed weather details of a given location through designing an user interface.
- Visualized several weather parameters by font-awesome icons based on fetched data from Open Weather API.

Achievements

- I Solved over 200 DSA problems in GFG ([View Profile](#))
- 5* in C++ programming on Hackerrank

Hobbies

- I like to play and watch Cricket
